## ABOUT THE ITI

The International Team for Implantology (ITI) unites experts from all over the world and from all fields of dental implantology and related tissue regeneration. As an academic organization, the ITI actively promotes networking and information exchange among its members. The ITI members – Fellows and Members – now numbering over 18,000, regularly exchange their knowledge gained in research and clinical practice at conferences, training events and congresses. The aim is to continuously improve treatment methods and results for the benefit of patients.

During its existence, spanning more than 40 years, the ITI has earned a reputation for scientific diligence combined with responsibility for patients. The organization actively supports the development and distribution of precisely documented treatment guidelines which are based on extensive clinical trials and recording long-term results. The ITI awards research funds and scholarships to young clinicians, holds congresses and advanced education courses and publishes scientific books like the “ITI Treatment Guide” book series.

**ITI Nordic Congress 2023** focusses on the hot topic of **controversies in implant dentistry**. When we treat patients, our priority is to ensure that they get the right evidence-based solution for the situation and that they understand the different options for treatment along with their consequences.

In our two-day congress in Copenhagen on September 1-2, we will be looking at choices. For each topic, two speakers will outline and justify different approaches to the same treatment situation before entering into an open discussion.

Join us in beautiful Copenhagen for a lively two days of discussions with **350 participants**.
